

CS 315 Homework 3

Due Friday, October 12, 2018 by 11:59 pm

First, STUDY your notes on recursion and **chapter 9** in your text.

Then create a class called **BinaryCodes** that has a main that calls two static methods, **generateBinaryCode** and **generateGrayCode**.

The description for these two methods is in questions 4 and 5 on pages 363 - 365 of your text.

When you are done, zip up the file and upload the zip onto Canvas.
